TETRAHEDRON LETTERS

EXECUTIVE BOARD OF EDITORS FOR TETRAHEDRON PUBLICATIONS

Chairman: **Professor H. H. Wasserman**
Department of Chemistry, Yale University, PO Box 208107, New Haven, CT 06520-8107, USA

Professor Sir J. E. Baldwin, FRS, Dyson Perrins Laboratory, Oxford, OX1 3QY, UK
(Fax: 44 1865 275632)

Professor D. L. Boger, Department of Chemistry, The Scripps Research Institute, La Jolla, CA 92037, USA
(Fax: 1 858 784 7550)

Professor D. Curran, Department of Chemistry, University of Pittsburgh, Pittsburgh, PA 15260, USA
(Fax: 1 412 624 9861)

Professor S. G. Davies, Dyson Perrins Laboratory, Oxford, OX1 3QY, UK
(Fax: 44 1865 275633)

Professor B. Ganem, Department of Chemistry & Chemical Biology, Baker Laboratory, Cornell University, Ithaca, NY 14853-1301, USA
(Fax: 1 607 255 8422)

Professor L. Ghosez, Laboratoire de Chimie Organique de Synthèse, Université Catholique de Louvain, B-1348 Louvain-la-Neuve, Belgium
(Fax: 32 10 47 29 44)

Professor N. K. Kochetkov, N. D. Zelinsky Institute of Organic Chemistry, Academy of Sciences, Moscow B-334, Russia
(Fax: 7 095 13 55 328)

Professor Lin Guo-Qiang, Shanghai Institute of Organic Chemistry, Chinese Academy of Sciences, 354 Fenglin Road, Shanghai 200032, China
(Fax: 86 21 64166263)

Professor S. F. Martin, Department of Chemistry and Biochemistry, University of Texas, Austin, TX 78712, USA
(Fax: 1 512 471 4180)

Professor W. B. Motherwell, Department of Chemistry, University College, 20 Gordon Street, London, WC1H 0AJ, UK
(Fax: 44 20 7380 7463)

Professor G. Ourisson, Centre National de la Recherche Scientifique, Centre de Neurochimie, 67084 Strasbourg, Cedex, France
(Fax: 33 3 88 607620)
(Associate Editor, Professor G. Solladié)

Professor G. H. Posner, Department of Chemistry, Johns Hopkins University, Baltimore, MD 21218, USA
(Fax: 1 410 516 8420)

Professor M. Shibasaki, Graduate School of Pharmaceutical Sciences, The University of Tokyo, 7-3-1 Hongo, Bunkyo-ku, Tokyo 113-0033, Japan
(Fax: 81 3 5684 5206)

Professor T. Shioiri, Faculty of Pharmaceutical Sciences, Nagoya City University, Tanabe-dori, Mizuho-ku, Nagoya 467, Japan
(Fax: 81 52 834 4172)

Professor W. Steglich, Institut für Organische Chemie der Universität München, Butenandtstr. 5-13, D-81377 München, Germany
(Fax: 49 89 5469225)

Professor R. J. K. Taylor, Department of Chemistry, University of York, Heslington, York, YO10 5DD, UK
(Fax: 44 1904 434523)
(Associate Editors, Dr P. A. O'Brien and Dr J. M. Vernon)

Professor E. J. Thomas, Department of Chemistry, University of Manchester, Oxford Road, Manchester, M13 9PL, UK
(Fax: 44 161 275 4622)
(Associate Editor, Dr T. J. Donohoe)

Professor C.-H. Wong, Department of Chemistry, The Scripps Research Institute, La Jolla, CA 92037, USA
(Fax: 1 858 784 7550)

Professor Y. Yamamoto, Department of Chemistry, Graduate School of Science, Tohoku University, Sendai 980-8578, Japan
(Fax: 81 22 217 6784)
(Associate Editor, Professor M. Hirama)

Editor Tetrahedron Organic Chemistry Series: **Professor Sir J. E. Baldwin, FRS,** Dyson Perrins Laboratory, Oxford, OX1 3QY, UK

TETRAHEDRON LETTERS

The International Journal for the Rapid Publication of Preliminary Communications in Organic Chemistry

Founded jointly by Sir Robert Robinson and R. B. Woodward

Chairman of the Executive Board of Editors for Tetrahedron Publications

Professor H. H. Wasserman

PERGAMON

Printed in Great Britain by Page Bros, Norwich

Publishing and Advertising Office. Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford, OX5 1GB (Tel: (01865) 843000; Fax: (01865) 843010).

Publication information. Tetrahedron Letters (ISSN 0040-4039). For 2000, volume 41 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.tetonline.com). Further information is available on this journal and other Elsevier Science products through Elsevier's website (http://www.elsevier.nl). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

Periodicals postage paid at Rahway, New Jersey. *Tetrahedron Letters* (ISSN 0040-4039) is published weekly January to December by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The annual subscription in the USA is $8859.00.
Tetrahedron Letters is circulated by Mercury International Limited, 365 Blair Road, Avenel, NJ 07001, USA.
POSTMASTER: Please send address corrections to: *Tetrahedron Letters*, c/o Customer Services, Elsevier Science Inc., 655 Avenue of the Americas, New York, NY 10010, USA.

Microform and Back Issues. Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford, OX5 1GB (Tel: (01865) 843000; Fax: (01865) 843010).

© 2000 Elsevier Science Ltd. All rights reserved.
This journal and the individual contributions contained in it are protected under copyright by Elsevier Science Ltd, and the following terms and conditions apply to their use:

Photocopying. Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science Global Rights Department, PO Box 800, Oxford OX5 1DX, UK; phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.co.uk. You may also contact Global Rights directly through Elsevier's homepage (http://www.elsevier.nl), by selecting 'Obtaining Permissions'.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (+1) (978) 7508400, fax: (+1) (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 171 631 5555; fax: (+44) 171 631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage. Permission of the publisher is required to store or use electronically any material contained in this journal, including any article or part of an article.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Science Global Rights Department, at the mail, fax and e-mail addresses noted above.

This journal is in the *ADONIS Service*, whereby copies of individual articles can be printed out from CD-ROM on request. An explanatory leaflet can be obtained by writing to: ADONIS B.V., P.O. Box 993, 1000 AZ Amsterdam, The Netherlands. Or you can contact ADONIS by e-mail: info@adonis.nl or visit the website at www.adonis.nl

Notice. No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

♾™ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

NUMBER 1

Contents

	vii	Contributors to this issue
	ix	Graphical abstracts
M. D. Chappell and R. L. Halcomb	1	Mild oxidation of cytidine-sialic acid phosphite derivatives using dimethyldioxirane
R. Kakaria, M. Ghosh, J. A. Anderson, R. G. Dulina and M. J. Sofia	5	Expeditious route to F unit building block of moenomycin A
S. D. Burke, J. J. Letourneau and M. A. Matulenko	9	Total synthesis of (+)-breynolide
R. S. Coleman, J. L. McCary and R. J. Perez	13	Thionucleoside disulfide cross-linked duplex DNA
G. Yao, P. Rempala, C. Bashore and R. S. Sheridan	17	Adamantylchlorocarbene: characterization and rearrangement to chlorohomoadamant-3-ene
R. S. Varma and D. Kumar	21	Manganese triacetate mediated oxidation of Hantzsch 1,4-dihydropyridines to pyridines
D. W. Nelson, R. A. Easley and B. N. V. Pintea	25	Nucleophilic perfluoroalkylation of nitrones
X. Creary	29	Reactions of halodiazirines with potassium ethyl xanthate
A. B. Charette, A. Beauchemin and J.-F. Marcoux	33	Preparation and reactivity of some functionalized halomethylzinc carbenoids
G. W. Kabalka, S. Yu, N.-S. Li and U. Lipprandt	37	The reaction of α,β-acetylenic ketones with dicyclohexylborane: stereoselective synthesis of functionalized trisubstituted olefins
S. D. Rychnovsky, O. Fryszman and U. R. Khire	41	Convergent synthesis of a polyol chain with 4-acetoxy-1,3-dioxanes using a 1,1-bis((trimethylsilyl)methyl)ethene linchpin
C. M. McBride, W. Chrisman, C. E. Harris and B. Singaram	45	Efficient synthesis of substituted benzenes from 1,3-dienes or 1,4-cyclohexadienes with $KMnO_4$ under mild conditions
Z. Ruan and D. R. Mootoo	49	A novel desymmetrization reaction of an acetogenin precursor: a formal synthesis of trilobacin and asimicin
Y. F. Yong, J. A. Kowalski, J. C. Thoen and M. A. Lipton	53	A new reagent for solid and solution phase synthesis of protected guanidines from amines
J. Andersch, D. Sicker and H. Wilde	57	Synthesis of spiro[pyrido[3,2-*b*][1,4]oxazin-2,2′-pyrans] based upon methyl D-*arabino*-2-hexulopyranosonate
K. Moughamir, B. Mezgueldi, A. Atmani, H. Mestdagh and C. Rolando	59	Direct preparation of vinyl halides from the corresponding ketones and acetyl halides
F. Simal, A. Demonceau and A. F. Noels	63	Ruthenium complexes containing diamine-based ligands as catalysts for insertion of carbenes into O–H bonds of alcohols
J. Augé, R. Gil and S. Kalsey	67	Conjugate additions of alkylchromium reagents mediated by chromium(III) chloride/manganese
P. Karoyan, A. Triolo, R. Nannicini, D. Giannotti, M. Altamura, G. Chassaing and E. Perrotta	71	Solid-phase amino-zinc-enolate cyclization for the synthesis of 3-substituted prolines
F. Chemla, N. Bernard and J. F. Normant	75	Metalation of 3-trimethylsilyl propargyl chloride: a stereoselective access to *trans*-propargylic oxiranes
R. Tripier, O. Siri, F. Rabiet, F. Denat and R. Guilard	79	A two step synthesis of the new 'octacyclam' and some other octaazacycloalkanes via reduction of tetraamide intermediates
T. Laïb and J. Zhu	83	An asymmetric total synthesis of sanjoinine G1
K. Bedjeguelal, L. Joseph, V. Bolitt and D. Sinou	87	Aglycon directed palladium β-alcoxyelimination on carbohydrate templates

A. Watanabe, I. Fujii, U. Sankawa, M. E. Mayorga, W. E. Timberlake and Y. Ebizuka	91	Re-identification of *Aspergillus nidulans wA* gene to code for a polyketide synthase of naphthopyrone
H. Shimizu, T. Hatano, T. Matsuda and T. Iwamura	95	Novel polar cycloaddition of 1,2-thiazinylium salt
A. Morohashi, M. Satake and T. Yasumoto	97	The absolute configuration of gambierol, a toxic marine polyether from the dinoflagellate, *Gambierdiscus toxicus*
H. Tazaki, T. Hayashida, F. Ishikawa, D. Taguchi, T. Takasawa and K. Nabeta	101	Lignan biosynthesis in liverworts *Jamesoniella autumnalis* and *Lophocolea heterophylla*
Y. Fukuyama, H. Yaso, K. Nakamura and M. Kodama	105	Total synthesis of plagiochin D, a macrocyclic bis(bibenzyl) from liverworts by intramolecular Still–Kelly reaction
Y. Nishigaichi and A. Takuwa	109	Stereospecificity in the Lewis acid-promoted allylation reaction of 3,3-disubstituted allyltins toward aldehydes
H. Uchida, A. Nishida and M. Nakagawa	113	An efficient access to the optically active manzamine tetracyclic ring system
S. Y. Kim, N.-D. Sung, J.-K. Choi and S. S. Kim	117	1*H*-Benzotriazol-1-yl methanesulfonate: a regioselective *N*-mesylating reagent
F.-T. Luo, A. Jeevanandam and A. C. Bajji	121	A novel palladium-catalyzed cyclization of β-iodo-β,γ-enones toward 2,5-disubstituted-furans
A. Matsuura, T. Nishinaga and K. Komatsu	123	Synthesis, structure and properties of naphthalene fully annelated with bicyclo[2.2.2]octene frameworks
C.-H. Tung and X.-H. Xu	127	Selectivity in the photo-Fries reaction of phenyl phenylacetates included in a Nafion membrane
L. J. Gao, T. Z. Zhao and G. D. Han	131	A novel method for the synthesis of a C/D-ring synthon of vitamin D derivatives from hyodeoxycholic acid
M. Frank, E. Kingston, J. C. Jeffery, M. O. Moss, M. Murray, T. J. Simpson and A. Sutherland	133	Walleminol and walleminone, novel caryophyllenes from the toxigenic fungus *Wallemia sebi*
E. J. Cabrita, S. X. Candeias, A. M. Ramos, C. A. M. Afonso and A. G. Santos	137	Novel acid catalysed 1,4-addition-type ring-opening polymerisation of cyclic phosphorimidates
S. M. Allin, C. J. Northfield, M. I. Page and A. M. Z. Slawin	141	A new approach to the synthesis of non-racemic isoindolin-1-one derivatives
S. M. Allin, C. J. Northfield, M. I. Page and A. M. Z. Slawin	143	A highly diastereoselective synthesis of 3-substituted isoindolin-1-one derivatives
A. N. Cammidge, R. D. Kelsey and A. S. H. King	147	Epoxide formation in the Friedel–Crafts reaction of adipoyl chloride and bromobenzene
P. B. Wyatt, C. Villalonga-Barber and M. Motevalli	149	Synthesis and Diels–Alder reactivity of chiral 2-(alk-1-enyl)-1,3,2-diazaphospholidine 2-oxides
S. Ceccarelli, U. Piarulli and C. Gennari	153	Synthetic studies on sarcodictyins and eleutherobin: synthesis of fully functionalized cyclization precursors
S. Kosela, S.-G. Cao, X.-H. Wu, J. J. Vittal, T. Sukri, Masdianto, S.-H. Goh and K.-Y. Sim	157	Lateriflorone, a cytotoxic spiroxalactone with a novel skeleton, from *Garcinia lateriflora Bl.*
O. Callaghan, C. Lampard, A. R. Kennedy and J. A. Murphy	161	A novel route to (±)-aspidospermidine: first application of 'radical-polar crossover' reactions to total synthesis
G. Sabitha, M. M. Reddy, D. Srinivas and J. S. Yadav	165	Microwave irradiation: Wittig olefination of lactones and amides
P. Mičúch, L. Fišera, M. K. Cyrański and T. M. Krygowski	167	Reversal of stereoselectivity of Mg(II) catalysed 1,3-dipolar cycloaddition. Acceleration of cycloaddition by microwave irradiation
P. Ballester, A. Costa, P. M. Deyà, M. Vega, J. Morey and G. Deslongchamps	171	Influence of remote intramolecular hydrogen bonds on the thermodynamics of molecular recognition of *cis*-1,3,5-cyclohexanetricarboxylic acid
M. P. S. Ishar and K. Kumar	175	Tandem reorganisation of 1,3-dipolar cycloadducts of C-(4-oxo-4*H*[1]benzopyran-3-yl)-*N*-phenylnitrone and allenic esters, leading to novel functionalized benzo[*b*]indolizines
G. Solladié, G. Hanquet and C. Rolland	177	Stereoselective sulfoxide directed reduction of 1,2-diketo-derivatives to enantiomerically pure *syn* and *anti* 1,2-diols. Correction of the relative configuration by X-ray and chemical correlation to goniobutenolides A and B

P. J. Biju and G. S. R. Subba Rao	181	A highly flexible route to tricyclo[4.3.1.$0^{3,7}$]-, and tricyclo[4.3.0.$0^{4,10}$]decanes. A short synthesis of pupukean-2-one
S. V. Kirpichenko, E. N. Suslova, A. I. Albanov and B. A. Shainyan	185	The sila-Pummerer rearrangement of 3,3-dimethyl-3-silathiane *S*-oxide
	I	Instructions to contributors

Contents

	vii	Contributors to this issue
	ix	Graphical abstracts
P. G. Jagtap and D. G. I. Kingston	189	A facile *N*-debenzoylation of paclitaxel: conversion of paclitaxel to docetaxel
S.-T. Jan, K. Li, S. Vig, A. Rudolph and F. M. Uckun	193	Stereoselective synthesis of a versatile intermediate for the total synthesis of mono- and bis-THF containing annonaceous acetogenins
B. H. Lipshutz, P. A. Blomgren and S.-K. Kim	197	Substitution reactions of aryl chlorides with organozinc reagents catalyzed by Ni(0)
B. H. Lipshutz, D. J. Buzard and C. S. Yun	201	Pd(0)-Mediated couplings of aryl nonaflates and triflates with diphenylphosphine-borane. Preparation of BH_3-stabilized, unsymmetrical triarylphosphines
T. M. A. Alves and C. L. Zani	205	New tetrahydroisoquinolinones from *Hyeronima oblonga* (Euphorbiaceae)
T. Ren and D. Liu	209	Synthesis of cationic lipids from 1,2,4-butanetriol
F. Firooznia, C. Gude, K. Chan, N. Marcopulos and Y. Satoh	213	Enantioselective synthesis of 4-substituted phenylalanines by cross-coupling reactions
D. L. Comins and G. M. Green	217	Asymmetric synthesis of dienomycin C
B. M. Trost and E. J. Hembre	219	Pd Catalyzed kinetic resolution of conduritol B. Asymmetric synthesis of (+)-cyclophellitol
V. V. Martin, I. S. Alferiev and A. L. Weis	223	Amplified fluorescent molecular probes based on 1,3,5,7-tetrasubstituted adamantane
L. U. Gron and A. S. Tinsley	227	Tailoring aqueous solvents for organic reactions: Heck coupling reactions in high temperature water
J. H. Hong, M.-Y. Gao and C. K. Chu	231	Synthesis of novel 3′-*C*-methyl-4′-thio apionucleosides via highly enantioselective elaboration of quaternary carbon by [3,3]-sigmatropic rearrangement
A. Wahhab and J. Leban	235	A simple procedure for the solid phase synthesis of unsymmetrically functionalised diamides from symmetric diacids
J. J. Weidner, J. J. Parlow and D. L. Flynn	239	Polymer-assisted solution phase synthesis: a general method for sequestration of by-products formed from activated acyl-transfer reactants
R. Radinov and E. S. Schnurman	243	Red-Al® reduction of 4-silyloxy propargylic alcohols. A surprising round trip for the silyl group
A. Hari and B. L. Miller	245	A new method for the mild and selective reduction of aryl nitro groups on solid support
F. A. Davis and W. M^cCoull	249	Asymmetric synthesis of aziridine 2-phosphonates and azirinyl phosphonates from enantiopure sulfinimines
A. R. Katritzky, W. Bao, Y. Fang, M. Qi and I. Prakash	253	The preparation of 1,5-dioxygenated-pent-2-ynes
D. A. Jaeger and D. Su	257	Regioselectivity control in a Diels–Alder reaction of a surfactant 1,3-diene with a surfactant dienophile
A. E. Keating, S. H. Shin, F. K. Huang, R. L. Garrell and M. A. García-Garibay	261	Experimental and computational modeling of biphenyl twisting in a solid-to-solid carbene reaction
R. E. Barrientos-Astigarraga, D. N. Moraes and J. V. Comasseto	265	Highly unsaturated conjugated systems from vinylic tellurides
J.-F. Nierengarten, D. Felder and J.-F. Nicoud	269	Preparation of dendrons with peripheral fullerene units

J.-F. Nierengarten, D. Felder and J.-F. Nicoud	273	Phenanthroline ligands substituted with fullerene-functionalized dendritic wedges and their copper(I) complexes
G. Bouhadir, N. Legrand, B. Quiclet-Sire and S. Z. Zard	277	A new practical synthesis of tertiary *S*-alkyl dithiocarbonates and related derivatives
P.-Y. Renard, P. Vayron, F. Taran and C. Mioskowski	281	Design and synthesis of haptens for antibody catalyzed hydrolysis of organophosphorus nerve agents
M. Labrouillère, C. Le Roux, H. Gaspard, A. Laporterie, J. Dubac and J. R. Desmurs	285	An efficient method for the preparation of bismuth(III) trifluoromethanesulfonate
B. Gaudinet-Hamann, J. Zhu, H. Fensterbank and C. Larpent	287	A convenient synthesis of bis-tetraazamacrocycles
S. Piguel, G. Ulibarri and D. S. Grierson	291	Studies toward the construction of the allyltrisulfide component in esperamicin-A, from 5-ketoshikimic acid derivatives. Part 1
S. Piguel, G. Ulibarri and D. S. Grierson	295	Studies toward the construction of the allyltrisulfide component in esperamicin-A, from 5-ketoshikimic acid derivatives. Part 2
H. Takakura and S. Yamamura	299	The first synthesis of a racemic acourtia isocedrene by means of electrochemical methodology in the key step
T. Sasaki, I. I. Ohtani, J. Tanaka and T. Higa	303	Iheyamines, new cytotoxic bisindole pigments from a colonial ascidian, *Polycitorella* sp.
S. Yamasaki, T. Iida and M. Shibasaki	307	Direct catalytic asymmetric Mannich-type reaction of unmodified ketones utilizing the cooperation of an AlLibis(binaphthoxide) complex and $La(OTf)_3{\cdot}nH_2O$
S. Honzawa, T. Mizutani and M. Shibasaki	311	Synthetic studies on (+)-wortmannin. An asymmetric construction of an allylic quaternary carbon center by a Heck reaction
T. Fujiwara, I. Saito and H. Sugiyama	315	Highly efficient DNA interstrand crosslinking induced by an antitumor antibiotic, carzinophilin
I. Ueda, Y. Sakurai, T. Kawano, Y. Wada and M. Futai	319	An unprecedented arylcarbene formation in thermal reaction of non-conjugated aromatic enetetraynes and DNA strand cleavage
M. Tori, T. Shimoji, S. Takaoka, K. Nakashima, M. Sono and W. A. Ayer	323	Structure of oxolucidine A, a lycopodium alkaloid
H. Fukui, Y. Fukushi and S. Tahara	325	NMR determination of the absolute configuration of cyclic chiral alkenes
M. Hirotani, S. Hirotani, H. Takayanagi and T. Yoshikawa	329	Blazeispirol A, an unprecedented skeleton from the cultured mycelia of the fungus *Agaricus blazei*
H. Takahashi, M. Iwashima and K. Iguchi	333	Determination of absolute configurations of β- or γ-methyl substituted secondary alcohols by NMR spectroscopy

	I	Instructions to contributors

Tetrahedron Letters
Instructions to Contributors

Note:* Tetrahedron Letters *authors are no longer required to format their manuscripts for camera-ready reproduction
Please follow these instructions carefully to ensure that the review and publication of your paper are as swift and efficient as possible. These notes may be copied freely.

Tetrahedron Letters offers rapid publication of important new developments in organic chemistry. Articles should be in the form of short communications announcing either experimental or theoretical results of special interest.

Journal policy
The preferred language of submission is English, but papers in French or German will be considered. Papers are submitted on the understanding that the subject matter has not been previously published and is not being submitted elsewhere. Authors must accept full responsibility for the factual accuracy of the data presented and should obtain any authorization necessary for publication. All papers are sent to referees who advise the Editor on the matter of acceptance in accordance with the high standards required. Referees' names are not disclosed, but their views are forwarded by the Editor to the authors for consideration. Authors are **strongly** encouraged to suggest the names and addresses of suitable referees.

Manuscript preparation
General requirements: The article (including artwork) should be no longer than four printed pages [as a guide for authors, a printed article will have a type size of 11/13 pt within a type area 160 mm wide by 210 mm deep (approximate word count: 1600)]. Manuscripts should be printed on one side of the page only, using black type on good quality white paper. Pages must be numbered. The corresponding author's full mailing address, plus phone and fax numbers and e-mail address should be included. The manuscript should be compiled in the following order: Title, Authors, Affiliations, Abstract, Keywords, Text, References, Captions, Tables, Figures, Schemes.

Graphical abstract: Authors must supply a graphical abstract when the paper is first submitted. The abstract should summarize the contents of the paper in a concise, pictorial form useful for rapid scanning of the journal. The manuscript title, authors and affiliations should be identical to those in the main paper. An example can be found in the journal following these instructions. Graphical abstracts must fit within the area shown in the example

Title: The title should be brief, specific and rich in informative words; it should not contain any literature references or compound numbers.

Authors and affiliations: Where possible, supply given names, middle initials and family names for complete identification. Use superscript lowercase letters to indicate different addresses, which should be as detailed as possible, and must include the country name. The corresponding author should be indicated with an asterisk, and contact details (fax, e-mail) should be placed in a footnote. There should be only one corresponding author. Information relating to other authors (e.g. present addresses) should be placed in footnotes indicated by the appropriate symbols (see overleaf).

Abstract: Authors must include a short abstract that states briefly the purpose of the research, the principal results and major conclusions. References and compound numbers should not be mentioned in the abstract unless full details are given.

Text: Text should be subdivided in the simplest possible way consistent with clarity. Headings should reflect the relative importance of the sections. Ensure that all tables, figures and schemes are cited in the text in numerical order. The preferred position for chemical structures should be indicated. Trade names should have an initial capital letter, and trademark protection should be acknowledged in the standard fashion, using the superscripted characters ™ and ® for trademarks and registered trademarks respectively. All measurements and data should be given in SI units where possible, or other internationally accepted units. Abbreviations should be used consistently throughout the text, and all nonstandard abbreviations should be defined on first usage. Authors are requested to draw attention to hazardous materials or procedures by adding the word **CAUTION** followed by a brief descriptive phrase and literature references if appropriate. The experimental information should be as concise as possible, while containing all the information necessary to guarantee reproducibility.

References: In the text, references should be indicated by superscript Arabic numerals which run consecutively through the paper and appear after any punctuation; ensure that all references are cited in the text and vice versa. The reference list should preferably contain only literature references; other information (e.g. experimental details) should be placed either within the body of the text, or as a footnote to the text. Preferably, each reference should contain only one literature citation. Authors are expected to check the original source reference for accuracy. Journal[1] titles should be abbreviated according to American Chemical Society guidelines (*The ACS Style Guide*; Dodd, J. S., Ed.; American Chemical Society: Washington, DC, 1997). Inclusive pagination is strongly recommended. Book references[2,3] should cite author(s), chapter title (if applicable), editor(s), book title, edition/volume, publisher name, publisher location, date and pages. Examples, including a thesis citation,[4] are shown overleaf.

The contents of papers are the sole responsibility of the authors, and publication shall not imply the concurrence of the Editors or Publisher.

1. Barton, D. H. R.; Yadav-Bhatnagar, N.; Finet, J.-P.; Khamsi, J. *Tetrahedron Lett.* **1987**, *28*, 3111–3114.
2. Katritzky, A. R. *Handbook of Organic Chemistry*; Pergamon Press: Oxford, 1985; pp. 53–86.
3. Smith, D. H.; Masinter, L. M.; Sridharan, N. S. In *Heuristic DENDRAL: Analysis of Molecular Structure*; Wipke, W. T.; Heller, S. R.; Feldmann, R. J.; Hyde, E., Eds. Computer representation and manipulation of chemical information. John Wiley: New York, 1974; pp. 287–298.
4. Cato, S. J. Ph.D. Thesis, University of Florida, 1987.

Footnotes: Footnotes should appear at the bottom of the appropriate page and be indicated by the following symbols: *, †, ‡, §, ¶, ||.

Tables
All tables should be cited in the text, and numbered in order of appearance with Arabic numerals. All table columns should have a brief explanatory heading and where appropriate, units of measurement. *Vertical lines should not be used.* Footnotes to tables should be typed below the table, each on a separate line, and should be referred to by superscript letters. Tables will be reproduced at 75% from the original hard copy supplied.

Artwork
Figures, schemes and equations must be cited in the text and numbered in order of appearance with Arabic numerals; other graphics should be placed at a particular position in the text but not specifically referenced. All graphics (including chemical structures) must be supplied camera-ready, for reproduction at 75% (column width 160 mm). Please ensure that all illustrations within a paper are consistent in type and quality. Captions should not be included as part of the graphic; instead all captions should be supplied at the end of the text. All graphics must be labelled with the figure or scheme number, and the corresponding author's name.

If graphics are created using ChemDraw the preferred settings are: font 10 pt Helvetica, chain angle 120°, bond spacing 18% of length, fixed length 14.4 pt (0.508 cm), bold width 2.0 pt (0.071 cm), line width 0.6 pt (0.021 cm), margin width 1.6 pt (0.056 cm), and hash spacing 2.5 pt (0.088 cm). Compound numbers should be in boldface.

Photographs: Four sets of original photographs should be supplied; please note that photocopies of photographs are not acceptable.

Colour: Colour figures may be printed in the journal at no charge to the author, provided that the Editor considers the colour necessary to convey scientific information. Colour figures should be supplied in hard copy format, ready for reproduction at 75%.

Journal conventions
Nomenclature: Authors will find the following reference book useful for recommended nomenclature. It is the responsibility of the author to provide correct chemical nomenclature.
IUPAC Nomenclature of Organic Chemistry; Rigaudy, J.; Klesney, S. P., Eds; Pergamon: Oxford, 1979.

X-Ray crystallographic data: Manuscripts reporting X-ray crystallographic data must be accompanied by lists of refined coordinates and esds for deposition by the Editor at the Cambridge Crystallographic Data Centre.

Characterization of new compounds: All new compounds should be fully characterized with relevant spectroscopic data. Microanalyses should be included whenever possible. Under appropriate circumstances, high resolution mass spectra may serve in lieu of microanalyses, if accompanied by suitable NMR criteria for sample homogeneity.

Supplementary material: Concise supplementary material may be provided for review purposes only. Supplementary material will only be published at the Editor's discretion.

Copyright guidelines
All authors must sign the 'Transfer of Copyright' agreement before the article can be published. This transfer agreement enables Elsevier Science Ltd to protect the copyrighted material for the authors, but does not relinquish the author's proprietary rights. The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature and translations, and includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems. Authors are responsible for obtaining from the copyright holder permission to reproduce any figures for which copyright exists. Copyright forms may be photocopied from recent issues of the journal. Please note that photocopied signatures are not acceptable.

Electronic submission of manuscripts
Tetrahedron Letters manuscripts can be submitted using the TetSubmit online submission and review environment. Authors are required to go to the website and upload their article and its associated artwork. An electronic (PDF) proof is generated and the reviewing process is carried out using that PDF. All correspondence between editor and author is performed by e-mail. Authors are, however, legally obliged to sign and return a physical transfer of copyright form by conventional mail.

TetSubmit, with full instructions on the use of the system, can be found at: http://www.tetsubmit.com/

Mail submission of manuscripts
The original and three copies of the manuscript, including the graphical abstract and a signed and dated copyright transfer agreement, should be sent to the appropriate editorial office (see below). Authors must also include a brief statement justifying acceptance. To achieve rapid publication authors are encouraged to fax or preferably e-mail their first submission to the Editor at the time that they mail the manuscript; the date of submission will be taken as the date of e-mail. The corresponding author's full mailing address, plus phone and fax numbers and e-mail address should be supplied to aid rapid communication. Papers sent to the wrong Regional Editor will be forwarded (causing delay) to the appropriate Editor as determined by the *permanent address* of the corresponding author.

Disk submission: When a manuscript has been accepted for publication by the editorial office, authors are requested to also supply their paper (and graphical abstract) in electronic format on disk. Please give full details of operating system, programs used, number of files sent, and information contained in each file. It is important that the file on disk and the accepted printout are identical.

Text: we can accept most word-processing formats (but prefer Microsoft Word: IBM or Macintosh). Most formatting codes will be removed or replaced on processing your article so there is no need for you to use excessive layout styling. In addition, do not use options such as automatic word breaking, justified layout, double columns, automatic paragraph numbering (especially for numbered references) or EndNote. However, do use bold face, italic, subscripts, superscripts, etc. Do not embed the figures into the text file.

Graphics: computer-generated illustrations, halftones and line/tones should also be provided where possible. The following points should be taken into consideration when preparing electronic graphic files: Tagged Image File Format (TIFF) or Encapsulated PostScript (EPS) files are preferred. Suggested packages for line graphics are ChemDraw, Adobe Illustrator (version 3.0 or above), Freehand and Corel Draw. Graphics created in WordPerfect and Word generally have too low a resolution for our requirements. Files of scanned line graphics can be accepted at a minimum resolution of 1000 dpi, for scanned halftones, 300 dpi, and scanned line/tones, 500 dpi. Colour should be scanned at 300 dpi (500 dpi for colour line/tones).

Since we cannot guarantee the usability of graphic files, hard copies of all illustrations must accompany the accepted printout of the manuscript in all cases.

(1) Austria, Germany and Switzerland and all papers in the German language, Professor W. Steglich, Institut für Organische Chemie der Universität München, Butenandtstr. 5-13, D-81377 München, Germany. **Fax: +49 89 5469225; e-mail: wos@cup.uni-muenchen.de**

(2) Contributions from Portugal, Spain, French-speaking areas and all papers in the French language, Professor G. Ourisson, Centre National de la Recherche Scientifique, Centre de Neurochimie, 5 rue Blaise Pascal, 67084 Strasbourg, Cedex, France. **Fax: +33 3 88 607620; e-mail: tetlett@chimie.u-strasbg.fr**

(3) China (including Hong Kong), Professor Lin Guo-Qiang, Shanghai Institute of Organic Chemistry, Chinese Academy of Sciences, 354 Fenglin Road, Shanghai 200032, China (manuscripts from Taiwan may be sent to Professor Lin, or to the usual Editor in Japan, at the choice of the authors). **Fax: +86 21 641 66263; e-mail: tetrahed@pub.sioc.ac.cn**

(4) Japan, North and South Korea and Macao, Professor Y. Yamamoto, Department of Chemistry, Graduate School of Science, Tohoku University, Sendai 980-8578, Japan. **Fax: +81 22 217 6784; e-mail: TL@yamamoto1.chem.tohoku.ac.jp**

Ganem, Department of Chemistry and Chemical Biology, Cornell University, Ithaca, NY 14853-1301, USA. **Fax: +1 607 255 8422; e-mail: tetlett@cornell.edu**

(7) Papers from Russian-speaking areas, Professor N. K. Kochetkov, N. D. Zelinsky Institute of Organic Chemistry, Academy of Sciences, Leninsky Prospekt 47, Moscow B-334, Russia. **Fax: 7 095 13 55 328**

(8) All regions other than those specified under (1)–(7) above, Professor E. J. Thomas, Department of Chemistry, University of Manchester, Oxford Road, Manchester, M13 9PL, UK. **Fax: +44 161 275 4622; e-mail: tetlet@man.ac.uk**

Proofs

Proofs will be despatched via e-mail or fax by the publisher and should be returned with corrections as quickly as possible, normally within 48 hours of receipt.

Offprints

The corresponding author will be sent 50 free offprints. Additional offprints can be ordered when the paper is accepted. Correspondence regarding offprints should be directed to: The Author Services Department, Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

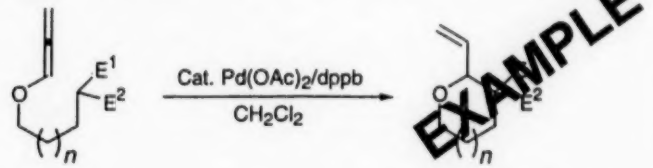
Tetrahedron Letters 40 (1999) 1747

Synthesis of cyclic ethers via the palladium catalyzed intramolecular hydrocarbonation of alkoxyallenes

S. Kamijo and Y. Yamamoto*
Department of Chemistry, Graduate School of Science, Tohoku University, Sendai 980-8578, Japan



EXAMPLE

n = 0,1,2

Good to high yields

The palladium catalyzed intramolecular hydrocarbonation of certain alkoxyallenes afforded five- to seven-membered cyclic ethers in good to high yields.

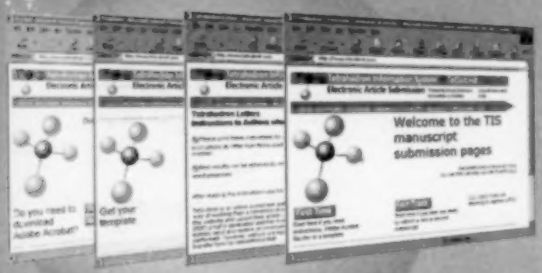
TetSubmit

Electronic Article Submission for Tetrahedron Letters

www.tetsubmit.com

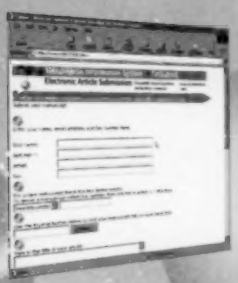
Welcome to TetSubmit

First Time users can access and download:



- Full instructions for TetSubmit
- Manuscript template according to the journals instructions to contributors
- The latest version of Acrobat Reader

Fast Track to submit or revise your manuscript.



To submit your manuscript:

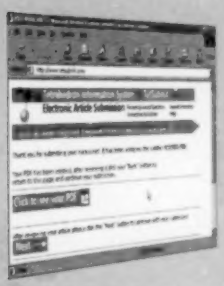
- Complete the form
- Use the browse button to attach your manuscript from your hard drive

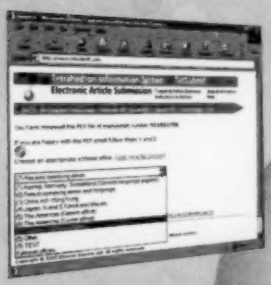
Submit

Wait 10 - 60 seconds...

- View your manuscript via PDF
- Take note of your manuscript number

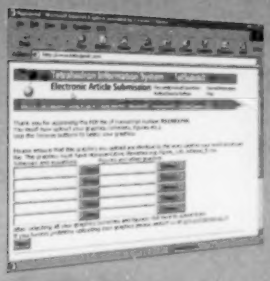
Next





- Approve PDF
- Select your nearest editorial office

Submit

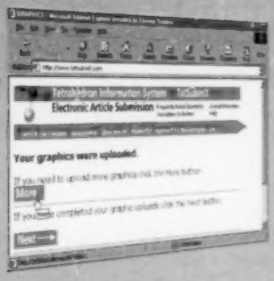


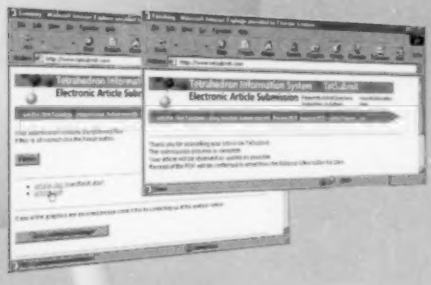
- Submit your tables and figures by using browse

Next

More if you would like to submit more tables and/or figures

Next to continue

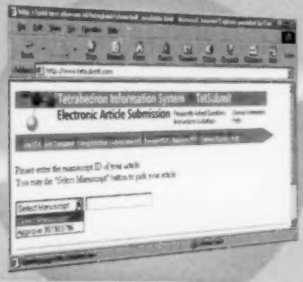




- Review your submitted documents

Finish

To revise your manuscript:



Fast Track

- Enter or select manuscript number
- Follow instructions as above

Progress bar

- Monitor submission progress
- Review PDF's

BRINGING THE WORLD'S LARGEST SCIENTIFIC DATABASE TO YOUR DESKTOP

SCIENCE DIRECT®

ScienceDirect® provides electronic full text access to more than 1,100 scientific, technical and medical journals published by Elsevier Science and the leading STM publishers.

- Desktop access to more than 750,000 full text articles across 14 fields of science
- Intuitive search and navigation through a simple Web-based interface
- Direct links to full text through a broad collection of secondary databases – delivered via the Internet or your local Intranet
- Current and back issues of journals plus links to document delivery services
